Experience

12/2019 – Today   Software Developer @ Freelance

As a freelancer I worked on multiple POCs for mobile (ReactNative) and web applications (React/NodeJS). I'm also consulting businesses that work in the industry on using JavaScript frameworks for frontend development.

10/2019 – Today   Software Developer @ Bluematic AG

I was hired by Buhler Group AG through Bluematic AG. There I am responsible for developing process automations within the Azure DevOps platform. I'm also working in a team to unify frontend components in an angular library.

09/2018 – 12/2019   Full-stack Developer @ CanvasHeroes B.V.

My responsibilities included developing API's using PHP (Symfony 4) and MySQL. During this time, I was mentoring two interns. The biggest challenge at that time was building an App in React Native and a Front-end for a large e-commerce site. I was also responsible for various DevOps tasks such as building CI and CD automations.

02/2018 – 09/2018   Front-end Developer @ CanvasHeroes B.V.

The main responsible was front-end development. One of my biggest achievements there was to implement a new development stack (React, Redux, SASS, Webpack) and educating my coworkers on it.

08/2017 – 10/2017   Junior Full-stack Developer @ Online Consulting AG

Responsible for the development of a tool that allowed our customers to migrate data from different ERP interfaces into the web-based platform, the company was developing at that time, without the need for a redeployment. This allowed us to save a lot of hours spent by developers building new interfaces and deploying the application on customer environments.

08/2013 – 07/2017   Apprentice Software Developer @ Online Consulting AG

During my apprenticeship I was part of a SCRUM team with members in Poland and Switzerland. Together we worked on a web-based platform for after sales services that is used by industrial customers. My responsibilities included the mobile optimization of the platform, implementing new workflows and building small data processing tools.

Education

09/2020 – Today   ZHAW, BSc Computer Science

08/2019 – 06/2020   BZWU, Federal Vocational Baccalaureate (BMS)

08/2013 – 07/2017   GBSSG, Vocational Education (EFZ), Application Development
